

SURF! Busway and Bus Rapid Transit Project

Project Construction Updates

Date(s) of Work: Starting October 2026

Location(s): Sand City, CA

SCAN ME

PHASE 1: OCTOBER 2 - 22, 2026

PHASE 2: OCTOBER 23 - ONWARD

LEGEND

--- Multi-Use Trail Closure

--- Multi-Use Trail Detour

--- Existing Trail Route

What to expect

As part of the SURF! Busway and Bus Rapid Transit Project, Monterey-Salinas Transit (MST) will be upgrading the intersection of California Avenue and the Highway 1 southbound on-ramp to a modern roundabout. SURF! improvements will help enhance traffic flow. MST will also extend the Beach Range Road Trail, creating an important connection for people walking, biking and scooting through the coastal trail network.

October 2 - 22, 2026: A section of the Monterey Bay Coastal Trail will be upgraded during this period. On **October 2, 2026**, trail users will be temporarily rerouted to the new Beach Range Road Extension. A temporary trail connector will provide access between the new Beach Range Road Trail and the Monterey Bay Coastal Trail. Please follow all posted signs and detours and when traveling through the area.

Starting October 23, 2026 (Tentative):

- The newly upgraded Monterey Bay Coastal Trail will reopen to trail users. To travel northbound toward Marina, please use the Monterey Bay Coastal Trail.
- The temporary connector across the busway will close.
- The Beach Range Road trail will remain closed while construction continues in the future roundabout area and on the Fort Ord Dunes State Park Campground Project. For more information about the Campground Project, please visit the [California State Parks website](#).

While these closures and detours are temporary, the improvements from both projects will provide lasting benefits, including safer and more reliable transportation infrastructure. Once construction is complete, trail users will also be able to enjoy approximately one mile of new trail connections, including the Beach Range Road Trail extensions at the southern and northern ends of the SURF! project.

Note: You may see crews in the area continuing other work, including vegetation management and retaining wall construction. Construction schedules may change without notice due to weather, site conditions, or other unforeseen circumstances. Additional lane restrictions and closures may occur during night work. For public safety, newly paved busway surfaces remain an active construction zone and are not open for public access or use. Please obey all posted signage, barricades, and traffic control devices, and do not enter restricted areas.
